Webster, NY 14534

Dear Linda,

Thank so much for working with us this week on how we can execute our vision. Your facilitation of the session and your skill in pulling our thoughts all together was awesome!

I found this whole exercise to be a powerful way to synthesize our thoughts and plans. This has been an ongoing challenge of mine for the entire 18 years of my centering practice.

When we were done with the Affinity Diagram process, nothing was left out. Because of this unique format my business was clarified. This will serve equally well as a mission statement, a foundational marketing blueprint and a plan to realistically achieve my goals.

This will take how I present my business to clients to a whole new level of professionalism. The output you created significantly improves my ability to plan effectively. And even more importantly I'll be able to *implement* --to produce significantly better results -- which means significantly more money and more recognition.

Thank you again for your support and assistance.

Blessings,

Marjorie Price
